Q: App Store Connect return empty localizations for all countries I am working on iOS app. I am trying to publish my app in App store connect, but the problem is App store connect is returning an empty list of localizations for all countries. I am using latest version of App store connect (v2.2.28). For iPhone Developers Searching in App store connect for country "France" returns Searching in App store connect for country "Tunisia" returns empty list of localizations It is only returning 1 language option for English A. The problem was that App store connect returned 2 language options for English with region US and 2 language options for English with region UK, but in French I was selecting only one language option with region UK. I fixed the problem by selecting Region from UK Then I got only 1 language option for English arXiv:hep-th/0108159}, O. Aharony, S. S. Gubser, J. M. Maldacena, H. Ooguri and Y. [Treatment of chronic peritonitis in children with chronic ambulatory peritoneal dialysis]. The authors present their experience with treatment of chronic peritonitis in children treated with chronic ambulatory peritoneal dialysis (CAPD). We used 6.2% glycine solution (MG) and about 50 units/kg/24 hrs of concomitant heparin subcutaneously (S.C.) to avoid peritonitis relapses. Six of 74 CAPD patients (8.1%) had recurrent peritonitis. We use steroids for treatment. The patients are treated with maintenance dialysis. Long-term follow-up shows no relapses and mild-moderate post-peritonitis syndrome. We conclude that CAPD is a method that can be used in children with end stage renal disease. The present invention relates to a water-proof piston ring of the kind comprising a crown having a circumferentially extending groove in which a piston is so shaped as to grip the piston ring in the groove by means of its crown and its shoulder. The demand for water-proof rings capable of resisting hydrodynamic gas pressures is increasing, i.e. the pressure difference between the inside and the outside of the ring is relatively large. It is an object of the invention to provide a ring which has such properties. In the present specification, the circumferentially extending groove means a groove running throughout the periphery of a ring and at least the ring has a shoulder on the lower side of the groove. The piston ring is of a trapezoidal cross-section with a narrower upper side and a wider lower side. The width of the upper side is about half the width of the lower side. The upper side is straight and the lower side has a concave cross-section. The upper side includes a crown part located in the groove and a ring part located outside the groove. The lower side comprises a shoulder located behind the crown part and a cylindrical portion located between the shoulder and the ring part. The crown part has a cross-section which is wider than the cross-section of the ring part and/or the groove. The outer diameter of the ring part is equal to or greater than twice the width of the lower side. Furthermore, the ring part and the shoulder have matching shapes, so that the groove is defined by the outer periphery of the crown part and the outer periphery of the shoulder. The water-proof piston ring according to the invention has the advantage that
